SUMMARY

Front-End Developer with strong experience in React and TypeScript, focused on building modern, responsive, and scalable web applications. Experienced in working with APIs, authentication, state management, and full-stack integrations using Supabase and Firebase. Passionate about clean code, reusable architecture, performance optimization, and creating smooth user experiences.

KEY SKILLS

- **Front-End:** React.js • TypeScript • JavaScript (ES6+) • HTML5 • CSS3 • Tailwind CSS • Bootstrap
 - **React & Web Development:** Context API • Custom Hooks • API Integration • Responsive Design • State Management • Component-Based Architecture • Performance Optimization
 - **Backend & Database:** Supabase • Firebase • Authentication • REST APIs • Cloud Storage
 - **Tools & Platforms:** Git • GitHub • Vite • Netlify • Vercel • Chrome DevTools • VS Code • Postman • Docker
 - **Familiar with:** Java • Python • C++
-

PROJECTS

AI-Powered Online Medical Consultation Platform (Graduation Project)

React • TypeScript • Vite • Tailwind CSS • shadcn/ui • Zustand • Yup • React Router DOM • Express.js • Docker • Postman

- Developed the complete front-end architecture for an AI-powered medical consultation platform connecting patients with doctors online.
 - Built responsive dashboards, admin panel, authentication system, and role-based access control for multiple user types.
 - Implemented calendars with monthly, weekly, and daily scheduling views.
 - Integrated REST APIs and collaborated on backend and AI service integration using Docker and Postman.
 - Developed dynamic tables, charts, chatbot interface, and consultation management workflows.
 - Contributed to AI-powered features including medical case summaries and patient assistance workflows using RAG and fine-tuned AI models.
 - Built reusable UI components and optimized application structure for scalability and maintainability.
-

MyNotes — Full-Stack Notes Management Application

React • TypeScript • Tailwind CSS • Supabase

[GitHub](#) | [Live Demo](#)

- Built a full-stack notes management platform with authentication and cloud storage.
 - Implemented tagging, search, filtering, and image upload functionality.
 - Optimized rendering performance using Context API, useMemo, and useCallback.
 - Created reusable UI components with responsive modern design.
 - Implemented protected routes and profile customization features.
-

Dynamic Form Builder with Google Sheets Integration

React • TypeScript • Vite • Tailwind CSS • shadcn/ui • Zod • React Router DOM

[GitHub](#) | [Live Demo](#)

- Developed a customizable form management web application for client data collection workflows.
 - Implemented dynamic form generation and validation logic.
 - Integrated Google Sheets API for real-time response synchronization.
 - Built automated email workflows for sending customized response notifications.
 - Designed responsive and reusable form components for scalable usage.
-

Interactive Quizzes Platform

React.js • CSS

[Live Demo](#)

- Built an interactive quizzes platform to help students practice and review educational content.
 - Implemented keyboard navigation for answering questions and switching between quiz sections.
 - Added detailed explanations and feedback for each answer.
 - Developed score tracking, wrong-answer review, and topic-based quiz organization features.
 - Structured the application for scalable addition of lectures and question sets.
-

Prompt Management Platform (Under Development)

React • TypeScript • Tailwind CSS

- Developing a productivity platform for organizing and managing AI prompts.
 - Implementing categorized prompt storage, quick search, and copy-to-clipboard workflows.
 - Building a clean and scalable interface focused on productivity and fast accessibility.
-

EXPERIENCE & TRAINING

React Front-End Internship — DEPI

Apr 2024 – Oct 2024

- Built responsive React applications and reusable UI components.
 - Worked with APIs, Firebase, and modern front-end development workflows.
 - Collaborated on individual and team-based projects.
 - Participated in developing a full-stack graduation project.
-

Freelancing Training — Elharefa

Oct 2024 – Nov 2024

- Learned client communication and project requirement handling.
 - Studied personal branding and freelancing workflow fundamentals.
-

Freelance Front-End Developer

- Developed custom React-based web applications for clients.
 - Built dynamic forms and dashboard interfaces.
 - Integrated third-party APIs and automated workflows.
-

EDUCATION

Bachelor of Information Technology

Egyptian E-Learning University (EELU)

2022 – Expected 2026

Relevant Coursework: Data Structures, Algorithms, Databases, Operating Systems, Software Engineering

CERTIFICATIONS

- React Front-End Development — Scrimba
- React Internship — DEPI
- Freelancing Skills — Elharefa
